Our team embodies a culture where prompt service and response to clients' distress calls on services; our hallmark for success, and we have the ability to draw from an experienced base of personnel whilst maintaining a personalized form of business liaison.

dervac Overview

Corporate Experience

Dervac combines strategic thinking, distinctive design, and emerging technologies to deliver innovative solutions that consistently break new ground. We strive to be the first choice provider of the Turnkey Solutions & Services, Outsourcing & Maintenance of Projects & Services with state of the art systems, equipment and services with complete back up support for our valued clients

Knowing as much information about the company you are to partner with is a critical factor in making a decision. To this end, Dervac includes the following information to help you get to know us better.

Our Promise and Dedication

We are dedicated to serving, satisfying and making our valued clients stay ahead of today's technology by providing updated IT Solutions. And to win new ones through excellent performance.

Our Vision

To become one of the world's leading provider of innovative, systematic and goal-orientated quality services and solutions with effective presence in Nigeria and Africa as a backbone.

Our Mission

To provide our clients with a healthy, Efficient, Cost-Effective and Quality ICT based services and solutions which are uncompromisingly based on the exact needs of the clients.

Commitment

"We remain steadfast in your project, dedicated to fulfilling your entrusted tasks. We tirelessly commit resources to ensure timely project completion and delivery."

Our Strategy

At Dervac, we won't just plan your company's IT Solutions; we will **BUILD IT, MAINTAIN IT, and HELP YOU GROW YOUR BUSINESS.**

Our Value

Our Values are the guiding principles to ensure we achieve our mission to be the best provider of ICT and business solutions.

Customer Satisfaction: We put our client's need first and strive to exceed their expectation.

Commitment to Quality: We are committed to Quality in our products and Excellence in our processes.

Teamwork: We are motivated by achievement of our dedicated team and collaborate to build growth for our company and clients.

Integrity, loyalty and Honesty: We believe in honest and ethical business practices.

We promise only what we can deliver. Then deliver more than what we promise.

dervac Overview

Our Team

Dervac is composed of highly creative, experienced and versatile professionals who are solely dedicated to exceeding the client's expectations.

Our team members are licensed, trained and qualified as well as hands on-experience, to handle multiple scenarios.

In order to keep them updated on the latest technology, we continue to equip our people through local and international trainings, seminars and workshops organized by top IT/ICT players in the world.

Hence, we are well prepared to serve all our customers with up-to-date quality and efficient ICT solutions.

Key Benefits

- Efficiently utilize resources
- Deploy resources optimally
- Reduce infrastructure and operating costs
- Design and implement to precision
- Improve revenue realization
- Enhance Security & Safety Measures
- Professional & Friendly Staff
- Proven Track Record

Why Work With Us?

There are many companies in Nigeria able to offer you these services and IT Solutions.

However, we believe that the total solution offered by Dervac is what separates us from other organizations.

When you choose Dervac, you get high level industry experience technological proficiency pre and post implementation support, quality training and timely delivery

- The Total Solution using some of the most innovative methodologies and expertise.

WHAT MAKES US DIFFERENT?

EXCLUSIVITY | AMAZING BENEFITS | ALL IN ONE SOLUTIONS

We stand out from the crowd in several ways:

Unmatched Customer Service: Really! Dervac "Extreme Customer Service" provides personalized attention, continuous communication, immediate action, and definitive follow-through. We listen and we deliver.

Exceptional Quality: We take pride in our ability to supply excellent solutions. Each is tailored to meet our customers' need and delivered on time.

Technology and Best Practices: We continually identify, test, and deploy new technologies and refine best practices to make a positive impact on our customers' business.

Independent and Objective: We are technology rooted and vendor neutral. Our experts provide you with sound and independent strategic advice.

Our Services & Solutions

Our Capabilities cover a wide range of products from high performance type to standard and economical range to suit various requirements.

Dervac Global Services Ltd. offers the following services and solutions

Network and Structured Cabling Systems

- o Data Center Infrastructure Solution
- o Network Installation and Upgrades
- o Network Maintenance and Support
- o Wireless Network Installation
- o IP Telephony & unified Communications

• Smart Home / Building Management & Automation System

• Power Backup Solutions

- o Solar Systems
- o Inverter and UPS Systems

IT Hardware & Support Services

- o Enterprise and Business Architecture
- o CBT Centre Setup and Management
- o IT Support & Helpdesk Management
- o Server Preventative Maintenance

Extra Low Voltages (ELV) Systems

- o Closed Circuit Television Systems solution.
- o Access Control System solution
- o Fire detection and fire alarm solution
- o Intrusion Detection Solution
- o Public Address System and Audio-Visual Distribution Solution

Technology and Solution

- o Managed Services
- o Infrastructure Management
- o Applications Management
- o Proactive Support Services

Web and Software Development Services

- o Domain Name Registration and Web Hosting Services
- o Website Design
- o Software Development
- o Digital Marketing and Social Media Engineering

Training Services and Customer Education Educational Technology Consultancy

Our Services & Solutions

IT Managed Services

Our IT services free you from routine tasks, enabling staff and resources to focus on revenue generation and valuable internal processes. We streamline your computing environment, enhance daily operations, and cut IT costs.

Dervac offers comprehensive multi-vendor support, overseeing your entire IT infrastructure, regardless of vendors.

Our Offerings Encompass:

- Cloud Solutions
- Data Center Management
- Network Support
- Security Measures
- Remote User Assistance
- Swift Issue

Technology and Solutions

Technology has solidified its position as the cornerstone of groundbreaking business models, embodying Innovation, Value, and Competitive Advantage. Maximizing the value derived from your technological infrastructure relies on a synthesis of elements, including:

- Trusted Equipment Manufacturers
- Seasoned IT Professionals
- Proactive Support Services

Our comprehensive solutions encompass a wide array of offerings, including: Microsoft Stack, Veritas, IBM Aspera, Network Monitoring Solution, Citrix, VMWare, Hyper-V including VDI and thin Client Computing, VOIP, Hyper-Converged Infrastructure Appliance - VXRail, Amazon Web Services, Microsoft Azure (Migration and Hybrid), Firewalls including Fortinet and Sophos.

Benefits: Vendor management, Original Equipment Manufacturers (OEM), Improved service quality and easy access to top IT experts and resources

Our Services & Solutions

Network and Structured Cabling Solution

Dervac Professionals can design and set up voice and data infrastructure to the highest standards; anything from a small office to a large-scale installation.

LAN stands for Local Area Network – also known as SCS (Structured Cabling System). In a small building, this can be simply CAT6 cabling from an MDF (Master Distribution Frame – i.e. equipment rack) while in larger infrastructures, you usually see multiple IDFs (Intermediate Distribution Frame) interconnected by fiber optic cables.

Our technical team will professionally design and implement complete network-infrastructure. Dervac takes pride in using high quality products to ensure the best standards of hardware and cabling are met.

Software and Web Development Services

Dervac is an experienced software development firm providing offshore software development services. We design and implement professional web applications based on modern technologies.

Our cost-effective solutions offer rich, user friendly and robust applications in combination with any modern database system. We follow our client's needs and offer solutions at the highest level.

Dervac has a mature understanding and extensive experience designing across all media. We use our knowledge and international experience to deliver tailor-made solutions. The application can be totally standalone running in a single machine, network solutions or internet connected application. Ranging from Enterprise Applications, Desktop Applications, Web Application, API and Addins, Mobile and Tablet Apps, Software Maintenance and Software Re-engineering

Our Services & Solutions

Closed Circuit Television Systems Solution

Dervac solution integrates complete portfolio for surveillance requirements, inclusive of cabling/wiring, camera supply and installation, recording solutions, storage and video walls for monitoring through the control room.

Our solutions are flexible and versatile for our clients across all the sectors. From analog to IP based systems, and together with our point-to-point, point-to-multipoint, mesh wireless links or over wired network, Dervac provides comprehensive solutions for surveillance.

Access Control System Solution

Access Control is a more sophisticated and modern equivalent of having a guard or security officer to restrict and control the entry to your premises. The implementation of a physical access control is very different to that of a virtual one that safeguards your computer and other network devices.

Controlling access has never been easier with our state-of-the-art access control solutions. We help you achieve complete and fool proof access control with internal and external release electronic and physical mechanisms for Doors, Barriers and Turnstiles according to your requirements.

You can choose credentials according to your convenience and budget, from key fobs, electronic smart cards or biometric solutions.

Our access control systems are scalable and can be adapted and configured to suit any need. We offer both physical and logical access control systems solutions. Some of the access control solutions we provide are:

- * Door Access Control
- * Biometric & Card based solutions
- * Time Attendance System
- * Automatic Doors & Barriers
- * Smart Automation with other ELV devices

Our Services & Solutions

Virtulization & Server Solutions

Small to midsize businesses often have limited resources and space constraints which means using virtualization can help reduce capital expenses, improve business continuity and increase the responsiveness of their operations.

With their IT budgets in constant pressure the payoff on such investments can seem rather high. However, virtualization can offer substantial cost reductions, productivity improvements and even enhance your overall business productivity.

Not just that virtualization can make your company more robust, agile and responsive to changing economic conditions and business opportunities.

Data Center Infrastructure Architecture

IT operations are a crucial aspect of most organizational operations around the world. A data center is a facility used to house computer systems and associated components, such as telecommunications and storage systems.

Data center architecture is the physical and logical layout of the resources and equipment within a data center facility. We deal in the supply of infrastructure items within the data center including: servers (virtual or dedicated); storage systems (for example - storage area networks, network attached storage, tape systems, optical systems); appliances (for example - de-duplication appliances, backup appliances); ancillary equipment (for example - UPS, firewalls, routers, switches); peripherals (for example – racks, leads, cable trays).

We provide consulting, planning and implementation of DATA centers of any size in different TIER levels. UPS systems, Remote monitoring systems, FM200 Fire systems, Security (Access control and CCTV monitoring), Generator, and other design concerns of DATA center.

Our Services & Solutions

Building Management Systems

A Building Management System (BMS), otherwise known as a building automation system (BAS), is a computer-based control system installed in buildings that controls and monitors the building's mechanical and electrical equipment such as ventilation, lighting, power systems, fire systems and security systems.

It is a blend of hardware & software based control system installed in buildings to control and monitor the building's extra low voltages (ELV) systems, mechanical and electrical equipment and security systems.

Dervac utilizes her inherent understanding of Information Technology deployments and ELV system in building automation.

The main benefits of a BMS are to optimize your energy management strategies and minimize operational costs.

Fire Detection and Fire Alarm Solution

A fire alarm system is number of devices working together to detect and alert people through visual and audio appliances when smoke/fire is present.

These alarms may be activated from smoke detectors, and heat detectors. They may also be activated via Manual fire alarm activation devices such as manual call points or pull stations.

Fire Alarm Systems (also abbreviated to FA or FAS), can be divided into two main types – conventional and addressable. We offer a wide range of products and systems for accurate, reliable fire detection and notification.

Our solutions provide accurate, life-saving information at critical moments and are relied upon to help and protect offices, residential buildings, warehouses, retail stores and many other establishments.

Our Services & Solutions

Power Backup and Solar Energy Solutions

Power Backup solution is inevitable in today's IT need of any businesses. Uninterrupted Power Supply (UPS) is an electrical apparatus that provides emergency power to a load when the input power source, typically mains power fails.

A UPS is typically used to protect IT hardware such as computers, servers, networking equipment or other equipment where an unexpected power disruption could cause injuries, fatalities, serious business disruption or data loss.

IP Telephony & Unified Communications

Unified communications (UC) is a framework for integrating various asynchronous and real-time communication tools, with the goal of enhancing business communication, collaboration and productivity.

A private branch exchange (PBX) is a telephone exchange or switching system that serves a private organization and switches calls between VoIP (voice over Internet Protocol or IP) users on centralized local office lines or trunks and provides intercommunication between a large number of telephone stations in the organization.

Our Services & Solutions

Public Address System and Audio-Visual Distribution Solution

Public address system is an electronic sound amplification and distribution system.

It works with the combination of a microphone, amplifier and loudspeakers, it will facilitate the person / recorded medium for making announcements, playing background music and broadcasting pre-recorded alarm notifications, sometimes automatically triggered by fire alarm systems to address large public / area, like announcements of movements at large area or on the Bus, Rail and Airport / Seaport terminals.

IT Trainings

Dervac offers high- end professional trainings on cutting edge technologies. The trainings are designed and delivered by the industry experts who have expertise in the respective fields.

Our basic goal of providing IT training to train professionals who will not only gain the technical skill but also achieve the working capabilities with the best tools and practices of the industry.

We deliver industry best practice trainings at our **HUB** or at clients site as appropriate.

Service & Maintenance

Service

We offer dynamic range of innovative and cost-effective solutions to various fields in annual maintenance contracts.

- ⌚ Preventive & Corrective Maintenance
- ⌚ 24/7 Round-the-clock monitoring and support
- ⌚ Periodic on-site visits for upgrades, maintenance and repairs.
- ⌚ Scheduled maintenance and health checkups for all components of your infrastructure.
- ⌚ Regular maintenance of communication systems and accessories.
- ⌚ Regular upkeep of user support systems.
- ⌚ Event-based or incident-based answering of support calls including rapid emergency response.
- ⌚ Detailed reporting on the state of health of equipment and support systems.
- ⌚ Periodic health check-up's and assessments

Annual Maintenance Contract

Our Annual Maintenance Contracts offer you a cost-effective, value for money solution which keeps your hardware and software healthy, your networks running productively, your communication channels efficient and your user support systems functioning flawlessly round-the-clock.

We make good use of rich industry experience and industry best practices to provide instantaneous and effective problem-solving and take care of all necessary upgrades and maintenance activity for your complete infrastructure.

Onsite Support

Every company faces problems when it comes to IT and telecom solutions and after sale services. Hence, we believe it is our duty and prerogative to assist our clients and help them build a smooth and hassle-free environment to work. Our onsite support team helps your company to set up systems and simultaneously trains your staff to address the minuscule day to day issues with great ease and comfort.

Our specialists team can enable the seamless integration of systems and technologies from different suppliers, as well as between legacy equipment and cutting edge technology.
